

## PRODUCT GUIDANCE SHEET

### ARPAX A9

#### CONCENTRATED NEUTRAL DETERGENT

A powerful super concentrated neutral detergent. Primarily used as a manual washing up liquid in commercial kitchens where high volume use requires ultimate control. It can also be used at extremely high dilutions for general hard surface and floor cleaning. To aid product recognition the ARPAX A9 product label, the solutions, both concentrated and diluted, and the label on the dispenser and trigger bottle are green.

Product Name:	ARPAX A9
Description:	Concentrated odourless neutral detergent
Pack Size(s):	2x2Lt
Pallet Size(s):	160
Product Code(s):	1085

### HOW TO USE

Used for washing up pans, utensils and other catering equipment that will not fit into the dishwasher. Designed to remove starches, grease and stubborn residues from larger catering utensils. Remember, highly soiled items should be soaked in a hot water and chemical solution before normal washing up commences.

**Caution:**  
**This product is designed to degrease plates and utensils, so it will de-fat hands also with prolonged use without protective clothing. Please ensure you wear rubber gloves at all times.**

ARPAX A9 must be diluted before use using an Arpax over-sink or bottle fill dispenser. For a sink cleaning solution add two to four plunges of dispenser to a sink of water depending on the degree of soiling.

### Over Sink Fill Instruction:

1. Pull GREEN lever in an upward direction until it CLICKS to prime the unit.
2. Pull lever towards you in an upward direction until it CLICKS. This is now ready to vend.
3. To vend product PUSH lever downwards. The concentrate will be dispensed into the sink at the correct dilution to water.
4. Wait for the green indicator to reappear in the window before vending again. It is suggested that 2-3 plunges is sufficient product in sink of warm wash water.

### Cross-Contamination Prevention

Premises should note that if there is no ability to gain thermal disinfection through an automatic dish or glass washing machine, to avoid a risk of cross contamination, a two-stage cleaning and disinfection washing up process as best practice:

**Stage 1 Cleaning:** Remove food debris then manually wash dishes or equipment and allow sufficient time for the product to penetrate the soiling, agitating heavily soiled areas if necessary. Rinse with fresh clean water or wipe down with a clean damp cloth.

**Stage 2 Sanitising:** In a separate sink prepare a disinfectant solution which meets BS EN 1267 standard. Immerse washed items into the disinfection solution and allow sufficient contact time before rinsing the surface with fresh clean water or a clean damp cloth. Allow to air-dry or dry the surface with a separate clean dry cloth.

## SAFETY ADVICE – WHEN HANDLING or DISPENSING THE CONCENTRATE

**DANGER** Causes serious eye damage. Causes skin irritation. Wear protective gloves and eye protection. IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses if present and easy to do. Continue rinsing. Immediately call a POISON CENTRE or doctor/physician. IF ON SKIN (or hair): Wash with plenty of soap and water. If skin irritation occurs: Get medical advice/attention.

**For further detailed information on this product please refer to the Safety Data Sheet.**

**FOR PROFESSIONAL USE ONLY**

## SAFETY ADVICE – WHEN USING THE DILUTED SOLUTION

Wearing eye protection is recommended when dispensing concentrate into bottle, but generally not needed for normal use of the cleaning solution. Wear suitable gloves. Avoid contact with eyes and skin. In case of contact with eyes, rinse immediately with plenty of water and seek medical attention. Keep out of reach of children.

### COSHH STATEMENT

COSHH is a law that requires all employers to take steps to control substances (chemicals) that may cause harm to employees, contractors and visitors to the workplace. Every work environment will be different in terms of the hazardous chemicals that are present, and how these are used, and individual assessments may be necessary to consider how chemicals can be handled and stored safely, in addition to ensuring that appropriate PPE and training is provided for employees. Product MSDS and Product Guidance Sheets are intended to help when carrying out a COSHH assessment, however if further advice is needed with regard to specific issues in your work environment we are happy to provide advice.
