

RINSAL AUTOMATIC DISHWASH RINSE ADDITIVE

Sheet Code: W23

DESCRIPTION

A highly effective pink coloured dishwashing rinse additive, developed to speed up the drying of crockery and cutlery and leave a sparkling streak free finish.

AREA OF USE

For automatic dishwashers only – used via the **ARPAL** auto dosing unit or the dishwasher's own integral feed system.

METHOD AND DILUTION

The chemical dose level is electronically controlled by the **ARPAL** auto dosing unit or by the dishwasher's own integral pump unit. The risk of contact with the chemical is limited to changing the container when empty.

For best results, the ideal rinse temperature should be 82-88°C.

N.B. If your machine is an integral fed type the current dose levels may have to be altered by your **OWN** service engineer. R.P. Adam Ltd can advise you of the correct dosing levels required for the use of our chemical.

HEALTH AND SAFETY

Although not classified as hazardous, we advise that normal safety practises should be adopted. Avoid any contact with eyes and wear rubber gloves for repeated or prolonged use. In case of contact with eyes, rinse immediately with plenty of water and seek medical advice.

**KEEP OUT OF REACH OF CHILDREN.
DO NOT MIX WITH OTHER CHEMICALS.**

For further information please refer to
Material Safety Data Sheet.
