

RINSE PLUS AUTOMATIC CONCENTRATED DISHWASH RINSE AID

Sheet Code: W91

DESCRIPTION

A highly effective concentrated dishwashing rinse aid designed for all water conditions that has been developed to speed up the drying of crockery and cutlery leaving a sparkling streak free finish.

AREA OF USE

This product is to be used via the **ARPAL - DUOTEK 2** dosing system ONLY sited next to the dishwasher. **Duotek 2** is an ultra safe liquid off-the-floor automatic dishwashing system, which uses super concentrates and is colour coded for the user.

METHOD AND DILUTION

The **ARPAL** auto-dosing unit electronically controls the chemical dose level. Each container must have a new dispensing straw inserted into a new container. These dispensing straws (4) are delivered in the box with the chemical containers. The risk of contact with the chemical is limited to inserting a new straw into the new container when changing the container.

For best results, the ideal rinse temperature should be 82-88°C.

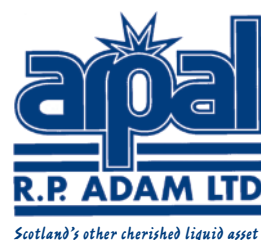

HEALTH AND SAFETY

Although not classified as hazardous, we advise that normal safety practises should be adopted. Avoid any contact with eyes and wear rubber gloves for repeated or prolonged use. In case of contact with eyes, rinse immediately with plenty of water and seek medical advice.

**KEEP OUT OF REACH OF CHILDREN.
DO NOT MIX WITH OTHER CHEMICALS.**
