

## PRODUCT GUIDANCE SHEET

### ADETTE

#### CONCENTRATED NEUTRAL DETERGENT

A powerful concentrated neutral detergent, primarily used as a manual washing up liquid in commercial kitchens to remove the heaviest starch, grease and stubborn residues. It can also be used at high dilutions for general hard surface and floor cleaning. Used for washing crockery, cutlery, pots/pans, utensils and larger equipment that will not fit into the dish washer. Highly soiled items should be soaked in a hot water/chemical solution before normal washing up commences.

**Caution:** Designed to degrease plates and utensils, so it will defat skin with prolonged contact without using gloves.

Product Name:	ADETTE
Description:	Concentrated odourless washing up liquid
Pack Size(s):	2x5Lt
Pallet Size(s):	80
Product Code(s):	1292000

### HOW TO USE

It must be diluted correctly with water to prepare effective sink cleaning solutions. Product is dispensed via a standard 5lt pelican pump, manual wall mounted bottle/bucket pump or via an automatic chemical/water mixing station available from us on a free-on-loan agreement basis.

For a sink cleaning solution add one plunge of dispenser per 10lt of water depending on the degree of soiling.

#### **Cross-Contamination Prevention:**

If there is no ability to gain thermal disinfection through a dish washer, to avoid cross contamination risks, a two-stage cleaning and disinfection wash process is best practice.

### Stage 1 Cleaning:

Remove gross debris then manually wash, allowing sufficient time for the product to penetrate the soiling, agitating heavily soiled areas if necessary then rinsing with clean water.

### Stage 2 Sanitising:

In a separate sink, prepare a disinfectant solution which meets BS EN 1267 standard. Immerse washed items into the solution and allow prescribed contact time before rinsing with clean water. Air-dry or dry with disposable paper - never use a tea towel, it may harbour harmful bacteria.

## SAFETY ADVICE

**DANGER** Causes skin irritation. Causes serious eye damage. Wear protective gloves/ eye protection/ face protection. IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. Immediately call a POISON CENTER/doctor.

**For further detailed information on this product please refer to the Safety Data Sheet.**

**FOR PROFESSIONAL USE ONLY**

### COSHH STATEMENT

COSHH is a law that requires all employers to take steps to control substances (chemicals) that may cause harm to employees, contractors and visitors to the workplace. Every work environment will be different in terms of the hazardous chemicals that are present, and how these are used, and individual assessments may be necessary to consider how chemicals can be handled and stored safely, in addition to ensuring that appropriate PPE and training is provided for employees. Product MSDS and Product Guidance Sheets are intended to help when carrying out a COSHH assessment, however if further advice is needed with regard to specific issues in your work environment we are happy to provide advice.
