THE ZERO IMPACT CLEANING FORCE 

which respects environment and people

The Zero line was born in 2015 and now, thanks to research and to the significant results achieved, we have widened our range of products by increasing the usage of natural origin raw materials obtained from renewable sources.

Now, Zero and Zero Extra represent, in the Professional market, **the most complete vegetal origin product line** which can meet all cleaning requirements on the market in an effective way and with a special attention for the environment.

More and more...
...a true force of nature for your cleaning!

4

ZERO and ZERO EXTRA ADVANTAGES

RENEWABLE RAW MATERIALS

ALKYL POLYGLYCOSIDES (APG) : they come from the processing of renewable sources (for examples, potatoes and corn). They are surfactants: they change the surface tension on dirt, helping its solubilisation and removal; They have emollient properties (they are used in cosmetics). They are not dangerous for the environment

COCONUT SOAP: it comes from coconut oil saponification process (salification); It contains glycerine which reduces skin irritation thanks to its emollient action; It has a solubilising action on greasy dirt (organic residues); It helps the chemical stabilisation of formulas.

ETHYL ALCOHOL: it comes from sugar beet fermentation. It is used as solvent and sanitiser and helps solubilise dirt on surfaces by mechanically removing germs and bacteria; It helps evaporation.

LACTIC ACID: It is a vegetal origin product coming from sugar beet fermentation processes. It can be used as limestone remover and PH regulator.

CITRIC ACID: this substance is present in nature in many vegetal organisms, for example it is contained in significant quantities in lemon and orange juices; Its primary function is the removal of limestone.

FRAGRANCES: all the products have a pleasant fragrance (for examples apple, apple vinegar, water lily, pine). All the fragrances used in the Zero line comply with Ecolabel requirements and IFRA standards.

WITH VEGETAL ORIGIN INGREDIENTS

Zero natural force

5

PRODUCT FEATURES & USP

Zero natural force

6

ZERO and ZERO EXTRA ADVANTAGES

VEGETABLE RAW MATERIALS and FULLY BIODEGRADABLE PRODUCTS

WITHOUT NICKEL, COBALT and CHROMIUM
 0.01 ppm (mg/kg): allowed limit in ZERO
 5 ppm (mg/kg): concentration limit considered as "safe".

ALLERGEN-FREE
 The Sutter Zero-line products do not have a warning label for allergic sensitisation

PARABEN-FREE

DERMATOLOGICALLY TESTED.

SUTTER GROUP DOES NOT CARRY OUT ANY TEST ON ANIMALS

7

ZERO and ZERO EXTRA ADVANTAGES

The Zero products do not have CLP pictograms, therefore they are not classified as hazardous (Reg. 1272/2008/EC CLP)

The Zero Extra products, in order to guarantee the high cleaning standards required in special applications, are fully biodegradable and from vegetal origin but still contain some active substances which require the application of some pictograms.

8

ZERO and ZERO EXTRA ADVANTAGES

- Superconcentrated detergents 
- At least 30% recycled and 100% recyclable plastic 
- 100% recycled and recyclable (made of FSC certified) 
- No symbols of danger 
- Mild fragrances to reduce at minimum the allergen risk 

9

ZERO and ZERO EXTRA ADVANTAGES

- No animal origin components: the Zero-line products do not contain raw materials of animal origin
- No cruelty: the Zero-line products and their components have not been tested on animals
- 85% of products Ecolabel certified

10

11

The EU Ecolabel detergents

The EU Ecolabel detergent product groups provide consumers an **eco-friendly alternative to conventional detergents** and lowering their daily environmental impact

12

The EU Ecolabel detergents

- To be awarded the EU Ecolabel, products and services must comply with ecological criteria that are set by panels of stakeholders and assessed by **independent experts**.
- The label ensures that the best decisions for the environment are made at every point of the **product's life cycle**, while delivering high-performance products and value for money

13

The EU Ecolabel detergents

- EU Ecolabel household detergents must respect minimum **thresholds for Critical Dilution Volumes**, must be composed of biodegradable surfactants and comply with strict restrictions on the number of hazardous substances present
- the EU Ecolabel **limits the amount of plastic** and waste destined to landfill by setting weight/utility ration (WUR) requirements to ensure that only the necessary amount of packing is used for the product.
- the EU Ecolabel detergents have been submitted to **test to evaluate efficacy** and cleaning power in comparison to conventional corresponding detergents

THE RIGHT SOLUTION FOR ALL ENVIRONMENTS

Following Sutter Professional long tradition, we have created a complete line which gives the professional user the opportunity of using those products for the cleaning of any type of surface and environment.

Floors Furniture Kitchen Bathroom Hands

Zero natural force

20

A complete product range for each environment

The image displays a wide range of Zero natural force cleaning products. At the top, five green circular icons represent different environments: Office (with a desk and chair), Reception (with a computer monitor), Kitchen (with a sink and stove), Bathroom (with a toilet and sink), and Hand Hygiene (with hands being washed). Below these icons, a horizontal dotted line connects to a large assortment of product containers. On the left, there are several bottles of Pine, Acacia, Emerald, and Flower. In the center, there are bottles of Diamond, Fresh, and Wash Plus. On the right, there are bottles of Ruby and Lotion Cleaner. The Zero natural force logo is in the bottom left, and the Sutter PROFESSIONAL logo is in the bottom right. A small copyright notice is visible at the bottom center: "Private & Confidential - No Redistribute - All Rights Reserved Sutter Industries Spa".

21

A complete product range for each environment

This image shows a more focused selection of Zero natural force cleaning products. At the top, three green circular icons represent the Office, Reception, and Bathroom environments. Below the icons, there are three groups of product containers. The first group, under the Office icon, includes bottles of Pine, Emerald, and Flower. The second group, under the Reception icon, includes bottles of Diamond. The third group, under the Bathroom icon, includes bottles of Ruby. The Zero natural force logo is in the bottom left, and the Sutter PROFESSIONAL logo is in the bottom right. A small copyright notice is visible at the bottom center: "Private & Confidential - No Redistribute - All Rights Reserved Sutter Industries Spa".

Super no-rinse wax stripper

5 Kg x 4

10% (1 L in 10 L of water)

a.s. 18 ± 1% - pH < 11,4

No rinse wax stripper with ecological formulation: the product is not classified as dangerous for the environment, non-caustic and developed without toxic components.

Wax stripper with high solubilizing power for quick removal of acrylic wax layers metallized. It also acts in the case of persistent layers of wax or on floors with many layers of wax. It can be used on all water-resistant floors and also suitable for PVC, rubber, plastic materials and hard floors (e.g. stone).

- > Certified with reduced environmental impact and with Type 1 environmental label, in compliance with 14024.
- > Excellent solubilising power for quick removal of wax layers
- > No rinse needed
